HISTORIAE CONCHYLIORUM

Libri Primi

Pars Prima

de

Turbinibus Terrestribus

Historia Conchyliorum

liber Primus

Paris Primum

de

Turbinibus conchyliis

I. S.

Cum forte animi causa Musæa aliquot hujus urbis ingressum, inter spolia marina aliquammodum Turbines Exoticos abere, quoniam alios Terrestres, alios aquæ dulcis sive Fluviales esse probe cognovi: sc. ex analogia nostrorum Angulus: nam olim a me editum. Cum autem nemo quid sciam (non qui vellem opere de his rebus scripserunt, quod tamen ipsi verandum est) hos a marinis distinguere, opere pretium esse duxi, ut qui in nostris manibus haberentur (qui sunt non pauci) aliorum in hac urbe Musæis reperti sunt, ipse breviter enarrarem, literisq. et Chalcographis fideliter mandarem.

Vicorum autem a quibus plerisque mutuo accepi, ut par est, mentionem facimus: ut non mea tantum ea de re, sed et publicæ gratiæ ipsi merito agerentur. At præ cæteris laude dignus est D. G. Courtein, tam ob summam industriam, quæ hæc maximis impensis colligit, nitida reponit, diligenter servat: quam ob singularem suam humanitatem, quæ mihi aliisque rerum naturæ inquisitoribus facilem adiuvum præstat, nobisque penitus locupletissimo, libenter copiam facit hæc aliisque id genus delineandi describendi.

Certiorum autem et amplius Cochlearum Terrestrium genera (ut de Fluvialibus nunc taceam) jam edidi: adeo haud verum est, quod nuper alicui temerè visum est, Terram ad Testacea generanda aquis minus aptam esse: imò vix dubito quin Terrestres Cochleæ etiam Marinas specierum numero æquant: si non superent. At hæc, opinor, in causa sunt, cur nonnulli aliter senserint: nimirum, Terrestres Cochleas, si Marinas referantur, magnitudinis exiguas esse: Deinde harum testæ fere leviores et tenuiores sunt, sc. propter expeditum motum.

43

et ne suis bestiolis nimio oneri sint: adeoque brevi pereant et dissipantur: cum Marinarum propter plerarumque crassitatem, vel extincto animali in ævum durent. Porro Marinarum Testæ continuis fluctibus in litus reijci solent: cumq. fere valide et crassa sint, in unum locum assidue accumulantur: at hæc causa Terrestribus Cochleis deficit, unde non nisi sparsim inveniuntur, densisque riparibus et sylvis maxime occultantur. His accedit, ex omni parte Orbis Marinas Cochleas ex industria, facile, et ex orio colligunt maris cuiusque, accolæ et nautæ, at Terrestres non nisi raro et casu ex ulla transmarina regione nobis afferuntur, et propter difficultatem appulsi, et quod sylvis et campis inter feros populos, imò mansuetos, Terra certe continetis non sine summo vite periculo adsistant, neque perscrutantur. Quod autem Terrestres Cochleæ Marinis et colorum varietate et pulchritudine non cedant (idq. etiam contra quorundam sensum) ex descriptionibus nostris ut opinor abundè constabit. Præterea duo sunt, Lector, quæ te scire volui. Unum, ex his testis aliquot posse esse marinas: ejusq. adeo rei, ubi aliqua suspicio est, notam fere adpono. Alterum, in aliquibus colorem naturalem fere perijisse credibile esse, sc. ubi ex toto albide sunt; at mihi ex vivis rebus ipsius perfectas descriptiones concinnasse fas non fuit: hanc felicitatem aliis relinquo. Hæc autem pauca et exigua literarum commode et incremento, maxime Historiæ Naturalis, cui vehementer studeo, litari.

5

Ein solches Buch ist in der That eine sehr interessante Arbeit, die nicht nur dem Forscher, sondern auch dem Laien eine Menge von neuen, bisher unbekannten Thatsachen mittheilt. Die Darstellung ist sehr anschaulich und leicht verständlich, so dass man sich auch ohne besondere Vorkenntnisse in die Materie einfinden kann. Die Sprache ist klar und prägnant, und die Zusammenfassung der verschiedenen Theorien und Hypothesen ist sehr gelungen. Besonders hervorzuheben ist die sorgfältige Arbeit, die in der Sammlung der Quellen und der Darstellung der verschiedenen Meinungen verlegt worden ist. Das Buch ist in jeder Hinsicht eine wertvolle Ergänzung zu den bisherigen Kenntnissen über die Geschichte der Naturwissenschaften.

Die Arbeit ist in drei Haupttheile gegliedert, die sich gegenseitig ergänzen und die verschiedenen Aspekte der Fragestellung beleuchten. Der erste Theil behandelt die Grundlagen der Naturwissenschaften und die Entwicklung der verschiedenen Theorien. Der zweite Theil beschäftigt sich mit den verschiedenen Methoden der Forschung und der Darstellung der Ergebnisse. Der dritte Theil schließlich fasst die verschiedenen Ergebnisse zusammen und zieht daraus die notwendigen Schlüsse. Die Arbeit ist in jeder Hinsicht eine sehr gründliche und sorgfältige Untersuchung, die dem Leser eine Menge von neuen, bisher unbekannten Thatsachen mittheilt. Die Darstellung ist sehr anschaulich und leicht verständlich, so dass man sich auch ohne besondere Vorkenntnisse in die Materie einfinden kann. Die Sprache ist klar und prägnant, und die Zusammenfassung der verschiedenen Theorien und Hypothesen ist sehr gelungen. Besonders hervorzuheben ist die sorgfältige Arbeit, die in der Sammlung der Quellen und der Darstellung der verschiedenen Meinungen verlegt worden ist. Das Buch ist in jeder Hinsicht eine wertvolle Ergänzung zu den bisherigen Kenntnissen über die Geschichte der Naturwissenschaften.

31. ejusdem altera valva plana, Denticulata .

Faint, mirrored text, likely bleed-through from the reverse side of the page.

Exhibet ostreum testâ exemptum, & integrum, ut partes ejus, quomodo habent in situ naturali, conspiciantur.

A. Ostrei caput, in cuius angulos B.B. musculi circulares totum corpus circumdantes terminantur. C. Hiatus inter musculos & Branchias ad os ducens. D. Superior hepatis portio coloris fusci ventriculo incumbens. E.E. Oesophagus ab ore ad ventriculum ducens. F.F.F.F. Intestinum a ventriculo versus musculi recti angulum descendens, quod inde intortum & convolutum, supra hepatis ascendit, ibi demersum, in G. emergit, ac in anum terminatur. H.H.H. Cuius cum carne glandulosa, & adiposa, viscera tegens, & uterjacent. I. Cavitas in qua pericardium, cum corde, & vasu. K. Musculus rectus, cum fibris perpendicularibus, totum aperiens. L. Musculus aliter rectus, cuius tendines utrique testis accrescentes eas occidunt. M. Eiusdem musculi crassities, & fibrarum altitudo denotantur. N.N. Musculi circulares e latere dextro Branchias includentes. O. Musculus circularis superior, Branchias incumbens, extra suam evolutus, ut Branchias conspiciantur. P. Musculus circularis inferior, Branchias substratus. Q.Q.R.R. Eorundem musculorum partes, e latere Ostrei sinistro confite. S. Sinus, ubi musculi utrique circulares, eorumque partes dextera, & sinistre coeunt. Ductum pro aquis ad Branchias admittendis, & inde excludendis constituunt. T.T.T.T. Branchiarum curvi quatuor inferiores, qui tenuiores, & latiores V.V.V.V. Earundem curvi superiores, crassiores, & contractiores.

Habet officium ista ex eadem & integrum ut partem
 est quomodo habent in ista natura suspensum.

A. D. 1717. Habet officium ista ex eadem & integrum ut partem
 est quomodo habent in ista natura suspensum.

Tabula Secunda

Repraesentat ostreum apertum, & evolutum ut viscera
ejus, & partes internae conspiciantur.

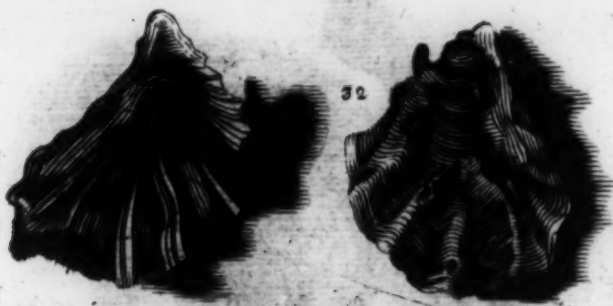

A.A. Duae Branchiae, i. superioribus dissectae, & extra situm proprium remotae, ut os ostreae
patet. B. Ostreae os. C. Ovis vulum, sive integumentum. D.D. Branchiae duae alterae superiores,
in situ propriae, cum vigis pterygiatibus. E. Hepatis portus superior oblique, sub quo ventriculus
latet. F. Cor pericardio nudatum, caput auriculae angula, & nigricans. G. Aorta, mox ab ingressu
cordis in tres ramos divisa. H. Ramus primus versus caput ascendens. I. Ramus Secundus in
musculos rectos. K. Ramus Tertius in Branchias tendens. L. Venae caeve truncus, cordis auri-
culam ingreditur. M.M.M.M. Branchiae inferiores, cum musculus circularibus ab Ostrea corpore,
ubi adhererent, abscisse, & expansae, ut illarum ductus, & cavitates aspiciantur. N.N.N.N.
Branchiarum juga, sive principia, quibus singuli rami, sc. vena, & arteria, o.o.o.o. insequuntur, &
foramina P.P.P.P. emittunt. Q.Q.Q.Q. Branchiarum tantulum extremitates, sive fenestrae. R.R. Musculus
circularis inferior, lateris dexteri, extra situm, & inversus, ut conspici possit. S.S. Eiusdem portus,
quae ostreae fundo cohaerebat. T.T. Eiusdem portus, quae ostreae lateri sinistram circumdant, portum V.
cohaerebat. W.W. Musculus circularis superior, lateris dexteri, complicatus, & contractus, ut Branc-
hiae abscondat. X.X. Eiusdem portus, quae ostreae lateri sinistram circumdant, portum X. cohaerebat.
Z.Z. Branchiae superiores, in qua parva, sive ductus strum, pro humore vitali, aquaeque ingerendis,
reperendisque agnoscunt. 1. Ostreae limbus inferior, a quo Branchiarum juga, & musculi circularis
absconduntur. 2. Intersitum portus in anum deferens. 3. Anus.

Tabula XXXII
 Representat cisternam apertam & videri
 quæ partes internas

A. Musculus vesicæ, B. Musculus uretræ, C. Musculus uretræ, D. Musculus uretræ, E. Musculus uretræ, F. Musculus uretræ, G. Musculus uretræ, H. Musculus uretræ, I. Musculus uretræ, K. Musculus uretræ, L. Musculus uretræ, M. Musculus uretræ, N. Musculus uretræ, O. Musculus uretræ, P. Musculus uretræ, Q. Musculus uretræ, R. Musculus uretræ, S. Musculus uretræ, T. Musculus uretræ, U. Musculus uretræ, V. Musculus uretræ, W. Musculus uretræ, X. Musculus uretræ, Y. Musculus uretræ, Z. Musculus uretræ.

stinali.

h. Stomachus inferior, sive ventriculus secundus,
subrotundus, cæcus; ubi Pylorus.

i. i. i. Ingluvies, sive Stomachus superior, rugis qui-
busdam sive plicis secundum longitudinem distinctus.

k. k. Omentum bifidum, stomachum superiorem
contegens.

l. l. Omenti tendines suspensorii, capiti utrinque
inserti.

m. m. Caput.

n. n. n. Musculi capitis retractorii.

o. Processus cæcus sub mento, an Arteriæ asperæ loco.

FIGURA II.

Dens Cochleæ, lunatæ figuræ, circiter quinque intus
exacuatus, è Microscopio depictus.

FIGURA III.

Cor, è costeo animali triquetrum; item Aorta fûcco
vitali, sive Cochleæ sanguine subcæruleo, instarque ovi
albuminis concreto, vehementer distenta.

FIGURA IV.

a. Vulvæ osificium.

b. b. Penis, præter in coitu exeritur.

c. c. Stimuli Venereæ thecæ, sive funda jaculatoriæ.

d. d. Ipsius fundæ apophyses, sive folliculi quidam
cîrrati, cæcæ appendices; Vascula Seminales existi-
manda.

e. e. e. Præputium, peni & flagello cartilaginoso con-
dendo inserviens.

f. f. f. Capreolus, sive flagellum cartilagosum.

g. Flagelli apex rotundus.

h. h. Ductus, sive vas quoddam deferens spermaticum.

i. i. Tendo penis retractorius.

k. Uteri vagina.

l. l. l. l. Ductus quidam, sive vas alterum deferens, à
Testiculo ortus, ipsique Utero tenui membranula an-
nexus.

m. Testiculus.

h. n. n. n. n. Uterus, multiplici cellularum apparatu in-
structus.

o. o. o. Uteri ligamentum latum, opacum, leve,
quasi vermiculatum.

p. p. p. Lactis, sive ingens quædam Glandula ad U-
terum spectans.

q. q. q. Ovarium.

r. r. Infundibulum ab Ovario ortum, catenæ instar
spissè revolutum; ad lactis alterum caput, Utero con-
junctum.

FIGURA V.

Spiculum Veneris, è Microscopio depictum.

FIGURA VI.

Tendines sive Musculi, & oculis & capiti, & toti cuti
movendæ inservientes.

a. Noduli, ubi plerique minores Nervi sive Ten-
dines concurrunt, ac si de natura spinalis alicujus me-
dullæ esset.

TABULA Secunda

Cochleas Terrestris fere spectat.

FIGURA I.

Spiculum ex utero Cochleæ vulgaris majoris hor-
tentis.

FIGURA II.

a. a. Intestinum Rectum.

b. Ejus exitus.

c. c. Intestinorum volumina, præter naturaliter per ip-
sum hepar intestinale reflectuntur; at nudata ab hepate
isto suo.

d. Ventriculus inferior, sive cæcus.

e. e. Ingluvies, sive Ventriculus superior.

f. Gula.

g. Processus cæcus sub mento.

h. Labrum inferius.

i. i. Maxillæ.

k. Dens fulcatus, spadicei coloris.

FIGURA III.

a. Vulva ejusdem Cochleæ exerta.

b. b. Fundæ, sive Spicali Capsulæ, ejus & seminis vas
ejaculatorium.

c. c. c. Penis, ut in coitu exerceri solet, uncatus ipsi
vulvæ adnexus.

d. d. d. Capreolus, & Penæ exiens.

FIGURA IV.

Capreolus è Penæ eductus integer.

FIGURA V.

Nodus in Capreolo oblongus, stimulis uncatis exalte-
ratus, è microscopio depictus.

INDEX TABULARUM.

FIGURA VI.

Uteri appendices corniculantes, sive Folliculi seminales in Cochleis Nigritis à me dictis.

FIGURA VII.

Nigritæ Cochleæ sic dictæ spiculum, & vase ejaculatorio exemptum, atque è microscopio depictum.

FIGURA VIII.

Membra ad generationem spectantia Cochleæ Umbilicæ.

- a. a. Penis.
- b. b. Vas ejaculatorium, claviculatum intusque cochleatim intortum.
- c. Vulva.
- d. d. Testiculus cum vase deferente ad vulvam.
- e. e. e. e. Uterus suis loculis ornatus.
- f. f. Lactis, sive glandula quædam ad Uterum spectans.
- g. g. Infundibulum, sive Funiculus tentis, crispatusque, ab Ovario ortus.
- h. Ovarium.
- i. i. i. Vesiculæ cæcæ semen continentes.

FIGURA IX.

Complexum quendam pelliceum intestinulorum cæcorum, hepatis facie, exhibet, Astaci fluviatilis.

- a. Ventriculus inferior cæcus, quasi biceps.
- b. b. b. Intestinum rectum.
- c. c. c. e. e. Hepar intestinale bifidum, pelliceum, ex innumeris intestinulis cæcis constans.
- f. Intestinulorum cirrus singularis explicatus.

FIGURA X.

Anatomiam exhibens Cochleæ cineræ, compressæ, fasciatæ Ericetorum.

- a. a. a. a. a. Penis, sive vas ejaculatorium, claviculatus, & tanquam biceps.
- b. Testiculus quasi biceps, cum vase deferente longiusculo.
- c. c. c. e. e. e. Fascimen quoddam crystallinum, quæ ipsius Uteri pars exposita est; punctulisque crebris albidis distinguitur, & quavis gelatina limpidius est.
- d. Lactis quædam, sive glandula ad Uterum spectans, subfusca; reliqua autem ut in superioribus.

TABULÆ Tertia

Ad Cochleas Terrestres spectantis, Explicatio.

FIGURA I.

Exhibet Membra ad generationem pertinentia, Cochleæ maxima-hortensis variegatæ.

- a. a. a. a. Vas deferens.
- b. Testiculus.
- c. c. c. Glandula ad Uterum spectans.
- d. d. Infundibuli pars sine Ovario.
- e. e. e. Uterus.
- f. f. f. Penis claviculatus, sive flagelliformis.
- g. Uteri orificium, sive Vulva.
- h. Uteri capsula pyriformis, in qua reconditur stimulus veneris; idem quoque existimandum vas ejaculatorium; scilicet, utriusque Sexui inserviens.
- i. i. i. Appendices cæcæ digitatæ, nempe vesiculæ seminales.
- k. k. Tendo retractorius Penis.

FIGURA II.

Una ex Appendicibus cæcis, sive vesiculis seminales supra expositis è microscopio aucta, depictaque.

FIGURA III.

Genitalia exhibet Cochleæ fasciis variegatæ & non fasciatæ.

a. a. a. a. a. Penis flagelliformis, sive claviculatus.

b. b. Tendo retractorius Penis.

c. c. Vas ejaculatorium, ipseque Vulvæ exitus.

d. d. Duæ vesiculæ seminales, omnium longissimæ, utraque in duos ramusculos divisa; ex iis autem ramusculis, tres duos tantum digitos habent, quartus verò ternos digitos exhibet.

e. e. e. Vas deferens.

f. Testiculus.

g. Glandula ad uterum spectans.

h. h. b. Uterus plicaturis conspicuus.

FIGURA IV.

Organa ad generationem spectantia exhibet Cochleæ fusca compressæ, acuto extimi orbis ambitu.

a. a. a. Penis claviculatus.

b. b. Tendo retractorius Penis.

c. Capsula ad condendum telum venereum, idem vas quoque ejaculatorium.

d. d. Vesiculæ seminales simplices, sive duæ tantum, & non digitatæ.

e. e. Uteri vagina.

f. f. Duo itinera, quorum alterum ad Uterum ducit; alterum ad Testiculum.

g. g. g. g. Uterus.

h. h. Glandula ad Uterum spectans.

i. Testiculus.

k. k. Infundibulum.

l. Ovarium.

TABULÆ Quarta

Ad Cochleas Terrestres spectantis, Explicatio.

FIGURA I.

Dissectio Cochleæ terrestris, striatæ, atque operculatæ. Masculini generis. Tit. 5. Historiæ nostræ Animalium Angliæ.

a. Penis. b. Testiculus. c. e. Vasa Spermatica. d. Clavicula, sive Hepar intestinale.

FIGURA II.

Penis ex Microscopio.

FIGURA III.

a. Eiusdem Cochleæ sceminae promuscis. b. b. Cornicula sive Antennæ. c. c. Oculi. d. Operculum pedi affixum. e. e. e. Uterus. f. f. f. Intestinum rectum, ac colon Scybalis referunt. g. g. Meconium, tanquam Hepar ex Intestinulis cæcis concretum, venisque quibusdam albis pulchrè distinctum.

FIGURA IV.

Organa generationi dicata, è Cochleæ quâdam parvâ terrestri dissecta.

TABULÆ Quinta.

Limacum, i. e. Cochlearum nudarum, scilicet alterius generis Terrestrium, Anatomia.

FIGURA I.

Limacis Nigri Cor, Viscere quodam, vero Hepati simili, quasi inclusum, è Microscopio depictum.

FIGURA II.

a. Eiusdem Limacis nigri Vulva suberocæ. b. b. b. Penis. d. d. d. Uterus cum suo ligamento. e. e. e. e. Glandula ad Uterum spectans. f. f. Infundibulum. g. g. Ovarium subcæruleum.

* Exeunte Augusto, Solo occidente, tempestate valde nubila atque bumida, flante Austro vehementer,

ter, loco quodam uliginoso, Limaces nigros vulgares in Copulâ vidi: tanquam vesiculis multum inflatis exertsque, mutuo inter se adharebant; divulsis autem, & breviusculas claviculas tenues, à se invicem demissas atque exeuntes è corpore animadverti, velut ab Androgynis.

FIGURA III.

Ejusdem Limacis intestina. *a. Gula. b. b. b. b. Ingluvies, sive Stomachus superior, vacuus, rugisque secundum longitudinem deductis conspicuus. c. Ventriculus cæcus, Marisupii alicujus in modum larefcens. d. d. Intestinarum cæcorum duo majores ramuli in innumeros ramusculos Hepatis cujusdam in modum conglomeratos, divisi. e. e. e. e. Intestina reliqua ad anum usque explicata. f. f. f. f. f. Hepar istud tanquam foliaceum, in duos maximos lobos, sive fibras deductum, expansumque. g. Sedes Ovarii in inferiore istius hepatis lobo. h. h. h. h. Vasa sanguifera argentea per universa viscera discurrentia.*

FIGURA IV.

Organâ generationi dicata Limacis cujusdam Succini colore, maculisque albis notati.

a. a. Penis. b. b. Testiculus oblongus. c. c. c. Uteri ligamentum quasi vermiculatum. d. d. d. d. Uterus. e. e. e. e. Glandula ad Uterum spectans. f. f. f. f. Infundibulum, sive Funiculus Tubulusve, ex Ovario ortus. g. g. Ovarium albidum.

FIGURA V.

Officulum cordi, præsidii causâ, superinjectum, è microscopio depictum.

FIGURA VI.

Limacis maximi cinerei, striati interiora exhibet.

a. Caput, corio sive pelle nudatum. b. b. Omentum bifidum. c. c. c. Ingluvies, sive Stomachus superior cibo distentus. d. Ventriculus inferior cæcus. e. e. e. Hepatis intestinalis cæcis compositi lobi explicati. f. f. Reliqua Intestina ex isto Hepate orta. g. g. Cor, viscere suo, id est, Hepate vero circumseptum. h. h. b. Vena cava ex Hepate.

FIGURA VII.

Ejusdem Limacis Organâ generationi dicata; quæ, paucis mutatis, explicari possint, ut superiorum omnium ejusdem generis.

FIGURA VIII.

a. a. Cor ejusdem Limacis. b. b. Membranula lacerata pars, quâ visceri cinereo, scilicet Hepati vero adharebat. c. c. c. Aorta, venis paulo crassior, ut ex coctione apparet. d. d. d. Vena cava, ex Hepate orta. e. e. Pars intestinalis recti. f. f. Pars intestinalis tenuioris. g. Locus, ubi venæ ab intestinalis venientes cum vena cava, ante ejus in Cor ingressum, committi videntur.

FIGURA IX.

Dens tricuspidis Limacis ejusdem.

FIGURA X.

Cor cum arteria magna, venaque cava ejusdem Limacis; scilicet eodem obliquo situ, quo in animali ponitur.

FIGURA XI.

Limacis minimi cinerei organâ generationi dicata. Glandula ad Uterum spectans bicornis. Testiculus angustior: reliqua serè ut in superioribus.

TABULA Sexta

Cochlea vivipara Fluviatilis Dissectionem Exhibet.

FIGURA I.

a. Intestinula cæca Hepati formis. b. Cor. c. c. In-

testigium Rectum. *d. d. Gula. e. e. Penis Maris. f. Dextrum Maris cornu obrusum, in quo Penis exitus est. g. Promuscis. h. Alterum cornu mucronatum. i. i. Oculi. k. k. k. Ventriculus, ac intestinalium reflectiones.*

FIGURA II.

Cochleam viviparam, Fœminam, resupinata dissectione explicitam exhibet, pede capireque dissectis.

a. a. Clavicula, sive Hepatis intestinalis pars. b. b. b. Ovarium. c. c. c. Aorta cœrulea cum corde rubente. d. d. Viscus quoddam, cordi proximum, triquetrum, cinereo-viridescens. e. e. e. Branchiæ. f. f. f. Uterus apertus cochleis exiguis repletus. g. g. Papilla crocea, sive Uteri exitus. h. Uteri fundus, ubi cum Ovario committitur.

FIGURA III.

Cochleæ alterius fluviatilis, sex spirarum, &c. ex resupinato animali dissectione.

a. Caput. b. b. Omentum Gulam amplectens. c. c. c. Gula. d. d. Ventriculus carnosus, quem

FIGURA IV.

Accuratiùs delineavimus.

e. e. e. Hepar intestinale totam claviculam occupans. f. f. f. Tuba Fallopiana, sive ductus multipliciter & spissè reflexus, albusque ex Ovario prodians, ac cum Utero commissus. g. g. g. g. Uterus ejusque plicaturæ; atque ipse penis. h. Testiculus subcroceus. i. Viscus quoddam, an verum Hepar, prope Cor situm. k. Ipsum Cor.

FIGURA V.

Cochlea altera vivipara, à Volga, Moscoviæ fluvio; item à fluvio Cam Angliæ.

TABULA Septima

Dissectiones exhibet Purpura Fluviatilis compressa, Tit. 26. Historia nostra Animalium Angliæ. Item Buccini Tituli 29. ibidem.

FIGURA I.

a. Buccini fluviatilis caput. b. Gula. c. c. c. Ventriculus subrotundus. d. d. Ejus Revolution. f. f. Intestini recti exitus. g. g. g. Ovarium granulis distinctum. h. h. Hepar intestinale.

FIGURA II.

a. a. a. Uterus purpureæ fluviatilis, flavus, ipsi Peni commissus complicatusque. b. b. Glandula coccinea ad Uterum spectans. c. c. c. Intestina cæca, in Hepatis quandam imaginem compaginata, claviculam ex magna parte occupantia. d. d. d. Tuba Fallopiana, ad fundum claviculæ, tortuosa sive anfractuosa.

FIGURA III.

Ejusdem Purpureæ sperma ejectum, compressum, & visque majusculis coccineis distinctum.

FIG. IV. & V.

Spermata ejecta illius Buccini fluviatilis.

TABULA Octava

Anatomiam exhibet Buccini marini; crassi, rufescentis, striati & undati Tit. 2. Historia nostra Animalium Angliæ.

FIGURA I.

a. a. a. Promuscis. b. b. Cornicula cum oculis ad eorum

rum radices. *c. c. c.* Penis. *d.* Exitus penis, five glans.
e. e. e. Cartilago quædam in Tubulum tortilis. *f.* Clavi-
cula leviter adumbrata.

FIGURA II.

a. a. Ejusdem Buccini marini cartilago in Tubulum
tortilis. *b. b.* Dux Branchiæ. *c. Cor.* *d. d.* Auricula
Cordis. *e. e. e.* Viscus quoddam Cordi appensum & cir-
cumfusum, an verum Hepar?

FIGURA III.

Dux Branchiæ nigricantes, five bifide, è microscopio
auctæ.

FIGURA IV.

a. Eadem interiores Branchiæ nigricantes. *b. b.* Ex-
teriores Branchiæ multo ampliores, & paulò minus ni-
gricantes.

FIGURA V.

Cor è vivo Buccino cocto.
a. Aorta rhomboides, concretò succo vitali albo, ex
coctione infarcto, distentoque.

FIGURA VI.

a. Ejusdem Buccini Gula à promulcide. *b.* Intesti-
num cæcum, subtrusum. *c. c. c.* Ventriculus. *d.* Que-
dam elegans Arteria, Pectiniformis. *e. e. e.* Colon.
f. Exitus intestinorum.

FIGURA VII.

Cujusdam Buccini marini, vivi, integrique, à *Papili*
Columnæ exhibitæ.
a. Canaliculus tortilis Branchiæ inserviens. *b. b.* Pe-
dis posterior pars digitata, five bifurcata.

TABULA Nona

Loliginem integram exhibet: item Auram
Marinam, Pectinemque ex muria.

TABULA Decima

Loliginis Anatomen exhibet.

FIGURA I.

G. Gladiolus Loliginis.

FIGURA II.

a. Rostrum. *b. b. b.* Labium cinctatum. *c. c. c.* Gula
five stomachus. *d.* Inguaves five ventriculus.
e. e. Appendices Ventriculi cæcæ. *f. f.* Vesica atramen-
ti. *g. g.* Intestinum rectum.

FIGURA III.

a. a. Duo Ovaria, veluti duæ mammae cum exiguis
papillis in utriusque summitate. *b. Cor.* *c. c. c. c.* Dux
Branchiæ duplicata.

FIGURA IV.

Fistula five Trachea, cum suis cruribus cartilaginosis.

FIGURA V.

Unguis aculeatus margine dentatè alter exiguus iuste
magnitudinis, alter vero è microscopio depictus.

FIGURA VI.

Mutis. *a. a. a. a. a.* Gula per fistulam eundem
perreptans. *b.* Ejus immerso in Mutin.

FIGURA VII.

Partes ad generationem spectantes; vide figuram deci-
mam infra, ubi eadem explicantur alio atq; naturali situ.

FIGURA VIII.

Glandula quædam magna, an Lactis extremum alvei
occupans.

FIGURA IX.

Partes Generationi dicatae, Marium putæ.

FIGURA X.

a. a. a. a. Ea pars Fœminini Uteri putæ, quæ Glandu-
læ proximò adjacet. *b. b.* Vas quoddam flexuosum, Ovi-
ductus putæ, five tuba Fallopiana tortuosa. *c.* An Ute-
rus. *d. d. d. d.* Vagina Uteri. *e. e.* Vesicula atramenti.
f. f. Vas ex intestinis ortum, vesiculæ atramenti infer-
tum. *h. h. h.* Intestinum rectum velut mesenterio quod-
dam circumdatum. *i. i.* Pars extrema mytidis. *k. k. k.*
Maximum vas Corde insertum, à mediâ mytide exiens,
velut Vena cava. *m. m.* Ipsum Cor. *n. n.* Alterum à
Corde vel ligamentum vel vas. *o. o.* Vel vas, vel liga-
mentum à Corde prodiens.

TABULA Undecima

Aliquot exhibet Viscera Loliginis, Sepiæ,
Polypi, ex Aldrovando, F. Redi, Swam-
merdamio apud Blasium.

FIGURA I.

*E*X Swammerdamio, quædam partes Sepiæ fœminæ
exhibentur.

a. Eructarium atramenti. *b. b.* Branchiæ. *c. c.* Ova.
d. Ductus, per quem exeunt Ova. *e.* Ovarium. *f.* Ex-
itus intestini, atque Eructarii Atramenti. *g. g.* Duo
Corpora glandulosa, fortè testes. *h.* Pars peculiaris hu-
morem rubellum continens.

FIGURA II.

Sepiæ Cor, cum Branchiis.
a. Cor. *b. b.* Branchiæ.

FIGURA III.

*E*F. Redi, Alimentorum Canales Sepiæ exhibet.
m. Rostrum. *n.* Oesophagus. *p.* Intestinum cæcum.
q. q. Intestina. *r.* Atramenti, five fellis Vesica. *s.* O-
rificium ad anum.

FIGURA IV.

*E*F. Redi, Alimentorum canales Polypi.
c. Rostrum. *d.* Oesophagus. *e.* Gula. *f.* Stoma-
chus avicularum æmulus. *g.* Intestinum cæcum. *h. h.*
Intestina. *k.* Atramenti, vel vesica fellæ. *l.* Exitus in
ano, ubi intestinum, & atramenti vesica sese exonerant.

FIGURA V.

Loliginis alimentorum canales.
r. Rostrum. *s.* Oesophagus. *x.* Atramenti, five ve-
sicæ fellæ. *y.* Intestina. *z.* Exitus ad podicem. *u.* Sto-
machus. *v. v.* Intestinum cæcum, five stomachus se-
cundus.

FIGURA VI.

Loliginis majoris ex Illyrio gladiolus, apud Aldrovan-
dum de Mollibus.

TABULA Duodecima

Musculi Fluvioatilis Anatomem, Saliaque quaedam fossilia exhibet.

FIGURA I.

a. a. Oris labia branchiata. b. b. b. Quatuor branchiae, quarum duae externae Sacculorum quoque uterinorum officio interdum funguntur; in quibus scilicet ova enixa continentur, atque incrementum sumunt. c. c. c. c. Pes carinatus. d. d. d. Venter, in quo Ovarium maximum spatium occupat; deinde Meconium, & reliqua intestina locum habent. e. e. e. e. Branchiarum velamentum evolutum. f. f. Imma pars velamenti sumpbris corniculatis & racemosis exasperata. g. Tracheae Orificium. h. h. h. E Testarum valvis una. i. i. i. i. Limbus musculosus velamenti.

FIGURA II.

Cor exemptum: a. a. Auriculae inflatae. b. b. Aorta.

FIGURA III.

Cor angustioris & ex flavo viridescens Musculi.

FIGURA IV.

Cor primum & supinum ex altero Musculo exemptum.

FIGURAE V. & VI.

Salium Crystallorum figura, e Concharum testis crematis, e Microscopio.

FIGURAE VII. & VIII.

Crystalli calcis lapideae plerumque aquarum medicatarum nostratum, ad justam magnitudinem a nobis depictae, & ante quindecim annos editae.

FIGURA IX.

Crystallus viscosa & pinguis, ex viridi ferè leviter rufescens, ex India Orientali, Tural dicta.

FIGURA X.

Idem Sal ex aqua dissolutum; instar Capiculi cujusdam Fungi concretum; scilicet ex innumeris quibusdam clavculis compaginatam.

TABULA Decima tertia

Pectunculi, Chama, itemque Tellina Anatomem exhibet.

FIGURA I.

Pectunculus vulgaris, Cochles Anglicè dictus, cum duabus Tracheis exertis.

FIGURA II.

a. Cor ex parte exemptum. b. b. Duo ligamenta testas constringentia. c. Trachea altera. d. d. Oris labia dependentia & branchiata. e. e. e. e. Branchiae. f. f. Pes, cujus pars anterior quandam vomeris figuram refert. g. Venter, ubi organa generationi dicata utriusque sexus.

FIGURA III.

Stylus quidam crystallinus.

FIGURA IV.

Tellina e testis exempta; cui membranae circumvectantes, & branchiae excisae sunt, ut reliqua clarius conspiciantur.

a. a. Ligamentorum, valvas constringentium, capita. b. Meconium. c. c. c. c. Revolutio intestini, rectum

verò intestinum superequitat posterius ligamentum. d. d. Pes carinatus. e. e. Ambae Tracheae. g. g. Caput labiis auriculatis notabile.

FIGURA V.

Chama Purris dicta, cum duabus Tracheis exertis.

FIGURA VI.

Una e valvis, facie sua interior, & ligamentum, & velamenti vestigia exhibens.

FIGURA VII.

a. a. Ligamenta valvas constringentia. b. Cor pericardio inclusum. c. c. Labia Oris dependentia. d. d. Branchiae radiatae. e. e. Duae Tracheae, sive fistulae branchiales. f. f. Venter, ubi illa viscera sunt, nempe Venter, Meconium, Intestinum, Ovariumque. g. g. Pes carinatus. h. i. Penis.

FIGURA VIII.

Cor ejusdem animalis exemptum.

TABULA Decima quarta

Mytuli marini Anatomem exhibet.

N. B. Sex priores hujus Tabulae Figuræ ferè ab Ant. de Heide depictæ fuerunt.

FIGURA I.

Mytuli cornu ramosa, scil. posita in limbo musculari ad apur, e Microscopio depicta.

FIGURA II.

Unus e cirris penniformibus, sive labiis branchiatis, e Microscopio.

FIGURA III.

Lingua dicta (potius Penis) cum suis Musculis e Microscopio.

FIGURA IV.

Stylus quidam crystallinus.

FIGURA V.

Mytulus in viro aquae marinae servatus, ubi ejus lingua dicta exertio, atque adhaesio ordinata representatur.

FIGURA VI.

Caput & os Animalis cum labiis penniformibus. a. Gula principium.

FIGURA VII.

Cor Mytuli a me primum exhibitum.

N. B. Figuræ autem sequentes hujus Tabulae, nempe 8, 9, & 10. apud Leewenhoekium habentur.

FIGURA VIII.

Exhibet microscopice villorum quorundam congeriem, veluti ramosam, cum aliquot acetabulis quibus singuli villi sive setae terminantur.

FIGURA IX.

Mytulus nondum natus ex ovo, exemptus. a. Placenta. b. Ipse Mytulus.

FIGURA X.

Pulcherrimus ille ordo depingitur, quo Ova, Mytulis foecunda, testis extrinsecus adhaereant; perque totum membranis pellucidis valde spectabilia esse.

TABULÆ XV, & XVI.

Ostreum exhibens dissectum; & sunt Willifianæ. ad singularum vero calcem ex are quoque suas Explicationes incidi curavi.

* Ostreis labia ista, ab ore pendentia, omnium Bivalvium Conchyliorum, quæ hæcenus mihi videre contigerit, longè validiora sunt; utpote & crassissima & rigidissima. cum itaque iis Pes aliquis, ad se movendum de loco in locum, omnino desit; ut se tamen vertant (quo motu ea frequenter gaudere dicuntur) his potissimum labiis, tanquam remis quibusdam pennisque utantur, verisimile est.

TABULA Decima septima

Pectinis Anatomem exhibet.

PECTINEM nactus, ineunte Januario, ejus dissectionem, quæ potui accurate, certè ex uno exemplari, institui. Imprimis vidi cardinem ex concavâ valvâ leviter incurvari, & superinjici alteri ac planæ valvæ in totoque illo latere inter se cartilagine quadam firmiter connecti. Item in ipso medio spatio Cardinis alteram acerrimam robustamque admodum cartilaginem disponi. Hinc adeò mira illa constrictionis vis, & fortasse planam valvâ, remi alicujus more movendi, adque pernecitatem & volatus quandam imaginem moliendam: de quo quidem non semel locuti sunt Veteres, tanquam huic Conchylio peculiari.

Apertis autem valvis hæc conspicienda sese exhibent. Ad dextram & sub cardine & cucullarum, instar Ostreae. Velamina autem oris conficiuntur ex concursu branchiarum exteriorum, quæ Musculosa sunt, totumque animal à capite ad ani exitum, scilicet sinistram versus & regionem oris, ubi inter se rursus connectuntur, circumambiant.

Ex isto autem pari branchiarum exteriorum ea, quæ planæ valvæ incumbit, centro suo adhæret superiori limbo ingentis cujusdam Musculi rotundi, qui ex rectis angulis in mediis valvis inseritur; altera verò exterior branchia similiter conjungi-

tur, alteri capiti ejusdem Musculi centralis.

A Musculo verò centrali ambæ istæ exteriores sive spuria branchia, è tenui Membrana & pellucida admodum constant: Et ad medias valvas expansæ, leviter iis adhærent, ut moveri inde non possint, ruenturque animalis dorsum, ab aquæ injuria, intra valvas receptæ, à loco vero istius adhærensionis, crassius quidam Musculus mirificus, tanquam Limbus, incipit. Is autem à me depingitur tantum eo quo contrahitur modo; sed in vivis mirè extensibilis est, etiam longè ultra margines valvarum. Item Laciniis donatur, & ex ruto variatur Lincolis elegantissimis. Multis autem diebus à piscatione nostri pectinis is limbus haud obscure movebatur. Usus autem ejus sic intelligo; nempe ex contractione incurvata introsum, more retis cujusdam, cum ambo isti branchiati Musculi extra conchas emissi sint, quicquid intra se complexi fuerint; sibi mutuo adpliciti, ad se rapiunt in victum animalis: Laciniis autem, extremis suis marginibus tenuiter incisis, aqua marina separari videtur, retento cibo. Si qui verò sint alii ejusdem partis usus, me latent; quod nec mores, nec victum hujus animalis privatim scio.

Illud tamen addere lubet de isto limbo mirifico exteriorum branchiarum, eum posse inservire non piscationi tantum victus, cum, instar retis, admodum extendi extra valvas solet; sed & necationi cujuslibet animalis minuti, aut pisciculi, ex forti compressione; itemque ex motu undulatorio, qui in eo valde notabilis est, posse circumferri victum; eumque tandem, quacunque parte circuli reticuli sit, ipsi ori exporrigi, ita manûs locum quodammodo supplet.

Ad veras autem, certè quæ ita appellari solent, Branchias venio, hæc verò quatuor sunt, leviter flavicantes, atque pectinatum striantur eleganti quodam opere. Illæ autem Branchiæ Musculum magnum centalem circumambiant, interque se comprehendunt sive incumbunt utero, ejusque Ovario, certè partibus generationi dicatis.

Harum autem partium Figuræ rectè à me antè delineatæ fuerunt; & jam vivo quoque animali video ejus partem inferiorem

riorem ex croco resplendere; superiorem verò albicare; juxta Os verò processus quidem, duplici foramine apertus, conspicendus est. Horum autem foraminum *Unum*, Vulvæ exitus existimandus est; & si androgyni sint pectines (quod suspicor ex perpetua similitudine illius partis in omnibus à me visis, & vivo & conditis) alterum, ad maris genitale membrum exerendum instituitur, atque hætenus de Branchiis & Organis generationi dicatis breviter dictum est.

Ad Caput procedo, huic Os labiis circumscriptum est rufescentibus, more branchiarum internarum; at brevibus admodum, & in nostro exemplari crispis, fortè vitiosis & mutilatis.

Sub ipsum verò cardinem medium duo prægrandes veluti circuli sive Cavitates instar oculorum (at oculi non sunt) alicujus Rhombi piscis, obliquè positorum.

Os verò caputque excipit majusculum Meconium, subnigrum, ad sinistram vergens. Pone id cor latitat, perque ipsum Pericardium pellucidum conspici potest; ex carneo leviter rufescit. Cordis aorta in branchias dispertitur. An verò id solum pericardium sit, quod scilicet proximè adjacet nigro meconio, sive totum etiam illud Figurâ rhomboide comprehensum, hæreo. An pars ejus inferior Vesica Urinaria sit. quæro: certè ex meconio oritur intestinum rectum, superque pericardium equitans, ad internas branchias protenditur, & musculo centrali adnectitur.

Musculus autem centralis orbicularis est, albus & lævis, magna superficiei suæ parte, quâ conchæ adhæret: ex sinistra verò parte alio candidiori musculo lacerato distinguitur, & conchæ magis firmatur.

Atque hæc est partium hujus animalis brevis quædam enarratio; earum verò usus (exceptis branchiis spuriiis) exhibere supervacaneum est, siquidem ex analogiâ cum reliquis id genus animalibus, à me publicatis, facile intelligi atque explanari possint.

a. a. a. Os Caputque. b. b. Meconium aterrimum. c. Cor, prout subter membranâ latitat. d. d. Pericar-

dium, an Vesica Urinaria rhomboides. e. e. e. e. e. Intestinum rectum pericardio superequitans. f. f. f. f. Magnus Musculus centralis. g. g. Alius Musculus laceratus, testis fortiter adhatens. h. h. h. h. Branchiæ internæ. i. i. Uteri prolongati exitus, duobus foraminibus distinctus, tanquam Androgynia. k. k. Uteri pars superior albidus. l. l. l. Uteri pars inferior crocea. m. m. m. m. Limbus variegatus, sive Musculus reticularis laciniatus, quibusdam branchiæ exteriores dictus; horum verò alter præcisus est.

TABULA Decima octava

Exhibet Berberi Antiquorum, i. e. Concham Margaritiferam Indorum, locumque Margaritarum proprium.

TABULA Decima nona

Pholadis, Conchæque Anatifera Anatomem exhibet.

FIGURA I.

Pholas integra, pronaque, ut omnes ejus quinque valvæ distinctè conspici possint.

FIGURA II.

Pholas integra supina, Trachæ ad apicem bifidâ, exerta.

FIGURA III.

Tō Tōō veterum, sive alterum Pholadis genus appêctatur.

FIGURA IV.

Concha anatifera, è testis exempta. a. a. Pennæ duplicatæ. b. Os. c. Musculus valvas majores constringens. d. Membra generationi dicata, alba varicosa.

FIGURA V.

Idem animalculum integrum cum pedunculo & cirris exertis.

FIGURA VI.

Favago quædam Ostrearum.

FIGURA VII.

Ostreæ Cor.

FIGURA VIII.

Cirri cum ore exempti. a. Os.

FIGURA IX.

Quinque valvæ explicantur, ut planè intueri possint.

TABULA Vigesima

Balani vulgaris Anatomem exhibet.

FIGURA I.

a. a. a. a. Balani, microscopice apud Læwenhoeckium depicti, pedunculi. b. b. b. Proboscis. c. c. c. c. Venter.

FIGURA II.

Ovâ ejusdem animalis apud eundem microscopice.

TABULA

TABULA Vigesima prima
Hepar Cancræ Marini falsum ex intestinis
cacis compactum, corisque cujusdam pellicet
amulum exhibet. Item utrosque dentes
tricuspides Sepiæ.

Tab. 24

Exhibet ostreum testâ exemptum, & integrum, ut partes
ejus, quomodo habent in situ naturali, conspiciantur.

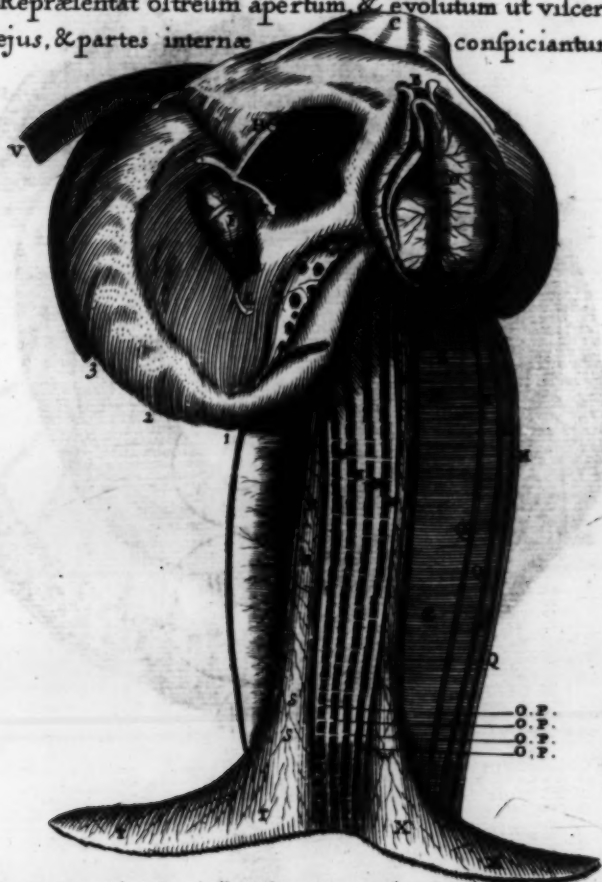

A. Ostrei caput, in cuius angulo B. B. musculi circularis totum corpus circumdantes
terminantur. C. Hiatus inter musculos & Branchias ad os ducent. D. Superior hepatis
pars coloris fusci ventriculo incumbens. E. E. Oesophagus ab ore ad ventriculum ducent.
F. F. Intestinum à ventriculo versus musculi recti angulum descendens, quod inde
intra & circumvolat, supra hepar ascendit, ibi demersum, in G. emergit, ac in anu-
m terminatur. H. H. H. Cuius cum carne glandulosa, & adipi, viscera tegens, & interjacens.
I. Intestinus in qua pericardium, cum corde, & vasis. K. Musculus rectus, cum fibris per-
pendicularibus, testas aperians. L. Musculus alter rectus, cuius tendines utrique teste
adhaerentes eas occidunt. M. Eiusdem musculi crassities, & fibrarum altitudo
apparet. N. N. Musculi circularis e latere dextro Branchias includentes. O. Mus-
culus circularis superior, Branchiis incumbens, extra suam evolutus, ut Branchie
aperiantur. P. Musculus circularis inferior, Branchiis substratus. Q. Q. R. R.
R. R. Musculorum partes, e latere Ostrei sinistro confectae. S. Sinus, ubi musculi
utrinque laterales, eorumque partes dextre, & sinistre coarctant. Ductum pro aqua
ad Branchias admittendi, & inde excludendi constituunt. T. T. T. T. Branchiarum cir-
cumferentia inferiores, qui tenuiores, & latiores. V. V. V. V. Earundem circuli supe-
riores, & contractiores.

1. A view of the interior of the stomach, showing the pylorus, the duodenum, and the jejunum. The stomach is shown in a contracted state, and the duodenum is shown in a dilated state. The jejunum is shown in a contracted state.

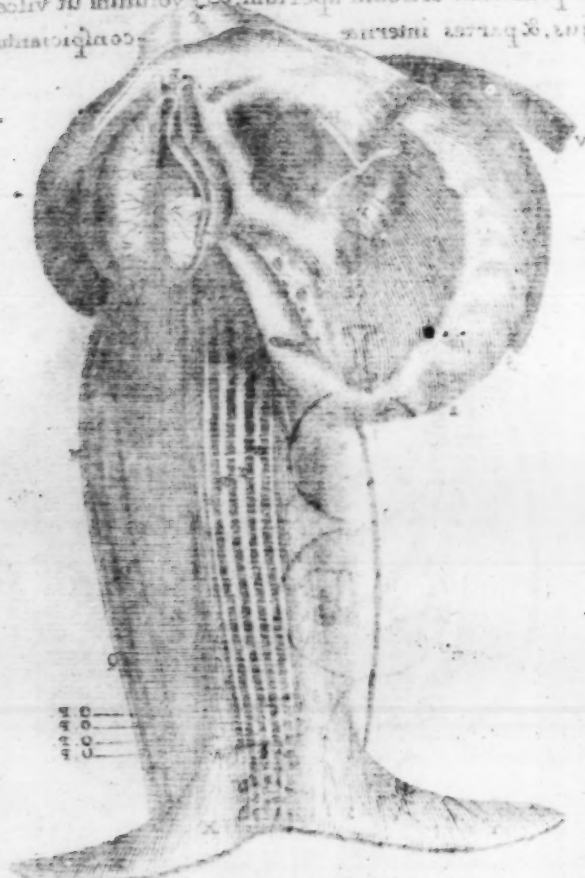

A view of the interior of the stomach, showing the pylorus, the duodenum, and the jejunum. The stomach is shown in a contracted state, and the duodenum is shown in a dilated state. The jejunum is shown in a contracted state.

Repræsentat ostreum apertum, & evolutum ut viscera
ejus, & partes internæ conspiciantur.

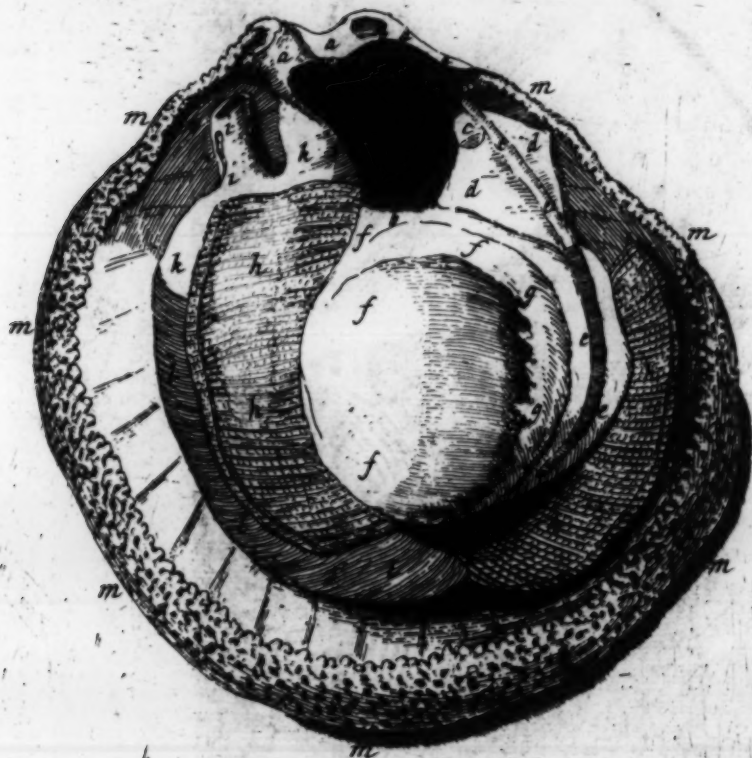

A.A. Duae Branchiae, i. superioribus dissectae, & extra situm proprium remota, ut os ostrea
patet. B. Ostrea os. C. Ostræ velum, seu integumentum. D.D. Branchiae duae alterae superiores,
in situ proprio, cum vasculis peristomatibus. E. Hepatis portus superior obfusca, sub qua ventriculus
latet. F. Cor pericardio nudatum, caput auriculae ampla, & nigricans. G. Aorta, mox ab egressu
cordis in tres ramos divisa. H. Ramus primus versus caput ascendens. I. Ramus secundus in
musculos rectos. K. Ramus Tertius in Branchias tendens. L. Venae caeve truncus, cordis auri-
culam ingrediens. M.M.M.M. Branchiae inferiores, cum musculis circularibus ab Ostrea corpore
ubi adhererent, abscissae, & expansae, ut illarum ductus, & caritatus aspiciantur. N.N.N.N.
Branchiarum iuga, seu principia, quibus singuli vasa, sc. vena, & arteria, O.O.O.O. inequaliter, &
foramina P.P.P.P. adhaerent. Q.Q.Q.Q. Branchiarum terindem extremitates, seu funebria. R.R. Musculus
circularis inferior, lateris dextri, extra situm, & incurvus, ut conspicui possit. S.S. Eiusdem portus,
qui ostrea fundo cohaeret. T.T. Eiusdem portus, qui ostrea lateri sinistram circumdans, portum V.
cohaeret. W.W. Musculus circularis superior, lateris dextri, complicatus, & contractus, na Branc-
hiam abscondit. X.X. Eiusdem portus, qui ostrea lateri sinistram circumdans, portum X. cohaeret.
Z.Z. Branchia superior, in qua primum, seu ductus striati, pro humore vitali, aqua, seu ingereendis,
reperendisque apparet. 1. Ostrea lobus inferior, a quo Branchiarum iuga, & musculi circularis
absconduntur. 2. Intestini portus in amon deflexus. 3. Anus.

Tabula Anatomica
 Representat ostium apertum & volumus ut videretur
 quod & pariter interius
 consistantur

A. A. The fundus of the stomach, which is the upper part of the organ, and is the part which is most frequently the seat of disease. B. B. The lesser curvature of the stomach, which is the inner curve of the organ. C. C. The greater curvature of the stomach, which is the outer curve of the organ. D. D. The pylorus, which is the lower part of the stomach, and is the part which leads into the duodenum. E. E. The duodenum, which is the first part of the small intestine. F. F. The jejunum, which is the middle part of the small intestine. G. G. The ileum, which is the last part of the small intestine. H. H. The caecum, which is the first part of the large intestine. I. I. The sigmoid flexure, which is the S-shaped part of the large intestine. K. K. The rectum, which is the last part of the large intestine. L. L. The anus, which is the opening of the large intestine. M. M. The bladder, which is the organ which stores urine. N. N. The ureters, which are the tubes which carry urine from the kidneys to the bladder. O. O. The uterus, which is the organ which carries the fetus. P. P. The ovaries, which are the glands which produce eggs. Q. Q. The fallopian tubes, which are the tubes which carry eggs from the ovaries to the uterus. R. R. The vagina, which is the canal which leads from the uterus to the outside of the body. S. S. The clitoris, which is the small, sensitive organ which is located at the top of the vagina. T. T. The labia majora, which are the large lips of the vulva. U. U. The labia minora, which are the small lips of the vulva. V. V. The perineum, which is the area of skin between the anus and the vagina.
